## New Fuel Screen STC for Cessna 180, 182 (early) and 185

STC No. SA02221AK for our new design replacement fuel screens that fit in the fuel bladders for Cessna 180's, early model 182's, and all 185's was issued February, 2005

These new replacement fuel screens are fabricated from a single piece of aluminum tubing that has the screen drilled into the side walls. After deburring and cleaning, the end is spun shut. **This design allows a 3 GPH higher fuel flow rate over the original part.** In addition, because our fuel screen design is a single piece it is stronger and easier to install, without fear of bending, cracking or breaking of the screen portion.

### Part Number

BAR0720000-69  
**\$250.00 each**

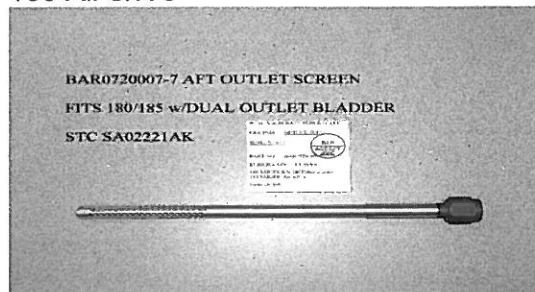

### Aircraft Model Applicability

180 Series S/N 30000 through 18051063  
182 Series S/N 33000 through 18253598

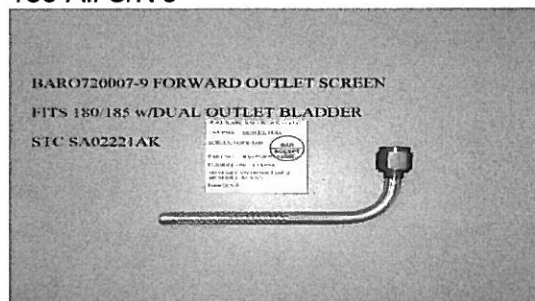

BAR0720007-7 (Aft)  
**\$250.00 each**

180 Series S/N 18051064 and up  
185 All S/N's

BAR0720007-9 (Front)  
**\$250.00 each**

180 Series S/N 18051064 and up  
185 All S/N's

Installation instructions and ICA (Instructions for Continued Airworthiness) include a table listing the complete cross-reference for original part numbers to the replacement part numbers.
